

Sante Speech Health Summary

Report ID: sum_6f54f71e6b74 | Generated: 2026-02-15 07:42 UTC

Session: conversation | Duration: 53.4s

Executive Summary

Data quality is limited; treat outputs as coarse exploratory estimates only.

- Perceived Vocal Age / Gender Proxy: exploratory-moderate (score 70, confidence 65%)
- Voice Strain / Respiratory Effort Indicator: exploratory-moderate (score 69, confidence 67%)
- Slurred Speech / Intoxication Likelihood: exploratory-moderate (score 56, confidence 61%)

Estimates

Mood / Depression Risk Signal | exploratory-low | score 1 | confidence 64%

Suggestion: Track trend across multiple days and pair with self-reported mood scales.

Evidence: Mean pause length 0.48s; Speaking-rate proxy 1.83 peaks/s; Disfluency ratio 0.62

Limitations: Speech-only estimate; mood state can be situational.; Exploratory speech biomarkers are probabilistic, not diagnostic outcomes.

Aphasia-like Language Pattern Flag | exploratory-moderate | score 54 | confidence 68%

Suggestion: If persistent, run structured language tasks and formal aphasia batteries.

Evidence: Phoneme coverage 254 tokens; Flagged disfluencies 157; Voiced segment rate 1.55/s

Limitations: Cannot subtype aphasia from this short speech sample.; Exploratory speech biomarkers are probabilistic, not diagnostic outcomes.

Perceived Vocal Age / Gender Proxy | exploratory-moderate | score 70 | confidence 65%

Suggestion: Use only as demographic context; avoid identity or eligibility decisions.

Evidence: F0 mean 25.03 st; Jitter 0.020

Limitations: Only estimates broad vocal age band, not chronological age.; Exploratory speech biomarkers are probabilistic, not diagnostic outcomes.

Slurred Speech / Intoxication Likelihood | exploratory-moderate | score 56 | confidence 61%

Suggestion: Confirm with behavioral checks and contextual history before acting.

Evidence: Jitter 0.020; Shimmer 1.541 dB; Mean pause length 0.48s

Limitations: Medication, fatigue, and microphone clipping can mimic this pattern.; Exploratory speech biomarkers are probabilistic, not diagnostic outcomes.

Cognitive Load / Fatigue Proxy | exploratory-low | score 43 | confidence 66%

Suggestion: Repeat under controlled conditions and compare with baseline sessions.

Evidence: Speech pacing proxy 1.83 peaks/s; Pause duration 0.48s; Disfluency ratio 0.62

Limitations: Single-session fatigue score is highly context-dependent.; Exploratory speech biomarkers are probabilistic, not diagnostic outcomes.

Voice Strain / Respiratory Effort Indicator | exploratory-moderate | score 69 | confidence 67%

Suggestion: Consider hydration, rest, and ENT/SLP follow-up if trend worsens.

Evidence: HNR 3.39 dB; Shimmer 1.541 dB; Jitter 0.020

Limitations: Breathing pattern cannot be directly measured from this sample.; Exploratory speech biomarkers are probabilistic, not diagnostic outcomes.

Transcript Snapshot

No, no, no, no merge conflicts. merge conflicts in my life. Let's enjoy the garlic. Yes, OK. And that's going to generate the better report, hopefully that will be. Cali. The sun is shining today. Please close the heavy green door.

Research-only estimate report. It is not a medical diagnosis. Use in combination with formal clinical assessment and environmental quality checks.
